That sounds much more constructive, Karen, and I think consistent with the original intent of this content format.

Many thanks,

Laura

Subject: Red flags

Laura -

I've got some edits to the EPA "red flags" that I want to send before you post. And if its ok with you, we are not going to call them "red flags" in our transmittal. Some comments fit that description, but there are others that I'd characterize as suggestions that we think would strengthen the document. I will get them to you tomorrow. - Karen
